SMART SECURITY

PREMIUM

Enjoy your digital life, secured by ESET's ultimate multi-layered antimalware protection for all internet users, built on ESET's trademark best mix of detection, speed and usability. With ESET Smart Security® Premium, you get to enjoy all the protection that ESET has to offer. As well as award-winning ESET Antivirus and Antispyware, you can generate and store ultra-secure passwords simply and easily, encrypt your USB storage devices, protect your webcam from misuse and easily check your home Wi-Fi router's security - plus, test smart devices connected to your router for vulnerabilities. You can also bank and pay online more safely using ESET's special secure browser window, and locate and secure your missing laptop. And with License Manager you can manage your connected devices and licenses via our my.eset.com platform.

Making the internet safer for you to enjoy

Explore the great online, securely protected by ESET's award-winning detection technology. It's trusted by over 110 million users worldwide to detect and neutralize all types of digital threats, including viruses, rootkits, worms and spyware. It also protects against techniques that seek to evade detection, and blocks targeted attacks and exploits.

Antivirus and Antispyware	Provides proactive protection against all types of online and offline threats and prevents malware spreading to other users
Exploit Blocker	Blocks attacks specifically designed to evade antivirus detection and eliminates lockscreens and ransomware Protects against attacks on web browsers, PDF readers and other applications, including Java-based software
Advanced Memory Scanner	Enables improved detection of persistent malware that employs multiple layers of encryption to conceal its activity
Cloud-Powered Scanning	Speeds up scans by whitelisting safe files based on the ESET Live Grid® file reputation database Helps to proactively stop unknown malware based on its behavior, by comparing it with our cloud-based reputation system
Scan While Downloading Files	Decreases scanning time by scanning specific file types – such as archives – during the download process
Idle-State Scanning	Aids system performance by performing in-depth scans when your computer is not in use Helps detect potential inactive threats before they can cause damage
Host-Based Intrusion Prevention System (HIPS)	Lets you customize the behavior of the system in greater detail Gives you the option to specify rules for system registry, active processes and programs to fine-tune your security posture
Script-Based Attack Protection	Detects attacks by malicious scripts that try to exploit Windows PowerShell Also detects malicious JavaScripts that can attack via your browser. Mozilla Firefox, Google Chrome, Microsoft Internet Explorer and Microsoft Edge browsers are all supported
UEFI Scanner <small>NEW</small>	Protects from threats that attack your computer on a deeper level, even before the start of Windows - on systems with the UEFI system interface.

Enjoy the full power of your computer

Leaving more power to the programs you use daily, ESET Smart Security Premium lets you play, work and browse the internet without slowdowns. Stay unplugged and online longer with battery-saving mode and enjoy gaming without distracting pop-ups.

Small System Footprint	Maintains high performance and extends the lifetime of hardware Fits any type of system environment Saves internet bandwidth with extremely small update packages
Gamer Mode	ESET Smart Security Premium automatically switches to silent mode if any program is run in full-screen System updates and notifications are postponed to save resources for gaming, video, photos or presentations
Portable Computer Support	Postpones all non-actionable pop-up windows, updates and system-hungry activities to preserve system resources so that you can stay online and unplugged longer

Protect your privacy

Enjoy safer connections and stay safe while online banking and making online payments. Protect your webcam and home Wi-Fi router from intruders, and protect your private data from ransomware. Safely store, generate and prefill your passwords, and encrypt your files and removable media (USB keys) to safeguard your privacy. Control privacy threats by actively testing your router-connected Smart devices.

Secure Data <small>PREMIUM</small>	Lets you encrypt files and removable media (e.g. USB keys) for ultra-secure safeguarding of your data. Protects against data theft in the event of USB-key or laptop loss, and allows secure collaboration and data sharing.
Password Manager <small>PREMIUM</small>	Helps you store and organize passwords, automatically fill in forms, and generate extra-strong encrypted passwords. All you need to remember is your master password. Can also generate and store extra-strong new passwords each time you need one.
Ransomware Shield	Blocks malware that tries to lock you out of your personal data and then asks you to pay a 'ransom' to unlock it.
Webcam Protection	Constantly monitors all the processes and applications running on your computer, to see which ones want to use your webcam. It alerts you to any that unexpectedly try to access your webcam, and lets you block them.
Connected Home Monitor <small>IMPROVED</small>	Enables you to test your home router for vulnerabilities, such as weak passwords or out of date firmware, and offers you remediation options. Provides you with an easy-to-access list of router-connected devices (smartphone, IoT, etc.), to show you who's connected. Enables you to scan smart devices for vulnerabilities, and gives you suggestions on how to fix possible issues.
Firewall	Prevents unauthorized access to your computer and misuse of your personal data
Network Attack Protection	In addition to Firewall, automatically protects your computer from malicious network traffic, blocking threats revealed by dangerous traffic patterns
Banking & Payment Protection	Features a special secured browser through which you can safely pay online. Automatically protects you on internet banking sites. Encrypts the communication between the keyboard and the browser for safer transactions. Protects you from keyloggers
Botnet Protection	Added layer of security that protects against botnet malware – preventing your computer from being misused for spam and network attacks. Benefit from a new type of detection thanks to Network Signatures, for even faster blocking of malicious traffic
Anti-Phishing	Protects you from attempts to acquire sensitive information such as usernames, passwords or other sensitive personal details by fake websites masquerading as trustworthy ones
Out-of-Home Network	Alerts you when connecting to an unknown network and prompts you to switch to the Strict Protection mode Makes your device invisible to other computers connected to the same network
Device Control	Allows you to prevent unauthorized copying of your private data to an external device. Allows you to block storage media – CDs, DVDs, USB sticks, and disk storage devices. Lets you block devices connecting via Bluetooth, FireWire and serial/parallel ports
Antispam	Keeps unwanted emails from clogging your mailbox

Free support in your language

Each license comes with free, industry-leading customer support, supplied locally in your language.

Enjoy more control over your licenses at my.eset.com

Create a free my.eset.com account and enjoy an instant overview of the status of your licenses and connected devices.

License Manager

NEW

View, manage and associate your licenses and ESET installations straight from our easy-to-use my.eset.com portal.

Anti-Theft – Stay safer by tracking and locating your missing computer

Protect your laptop in case it gets lost or stolen, and increase the chances of its retrieval.

Location Tracking

Lets you mark a device as missing via the ESET® Anti-Theft web interface at my.eset.com to initiate automatic monitoring. Displays position on a map based on the Wi-Fi networks in range when the device comes online. Allows you to access the gathered information via ESET Anti-Theft at my.eset.com

Laptop Activity Watch

Allows you to watch thieves via your laptop's built-in camera. Collects snapshots of the missing laptop's screen. Saves all recent photos and snapshots to the web interface at my.eset.com

Anti-Theft Optimization

Lets you easily set up/configure Anti-Theft for maximum protection of your device. Makes it easy to configure Windows auto-login and operating system account passwords. Helps you increase the level of security by prompting you to modify key system settings

One-Way Messaging

At my.eset.com, create a message and have it displayed on your missing device – to increase the chances of its retrieval

Keep your kids safe on the internet

Show kids only the good side of the internet with Parental Control, preventing them from being exposed to offensive online content. Block more than 20 website categories, or add individual sites to the blacklist.

Parental Control

Gives you the option to choose from predefined categories according to the age of your kids. Lets you set a password to protect settings against modification as well as prevent unauthorized product uninstallation.

Install and forget, or customize to meet your exact requirements

Delivering top protection right from the start with its default settings, ESET Smart Security Premium keeps you informed about potential security issues and lets you address them directly from the main screen. Its sleek user interface is designed to let you easily set up all routine tasks. In addition, you can fine-tune your security profile with more than 150 detailed settings.

One-Click Solution

Protection status and all frequently used actions and tools are accessible from all screens. In case of any security alerts, quickly find the solution in one click.

Smooth Product Upgrades

Benefit from new protection technologies as soon as they become available, for a continuously high level of security

Settings for Advanced Users

Offers in-depth security settings to fit your needs. Allows you to define maximum scanning depth, scanning time, size of the scanned files and archives, and much more

ESET SysInspector®

An advanced diagnostic tool that captures critical information from the system to troubleshoot a broad range of security and compatibility issues
